

**1. Goal**

This instruction describes the bonus system used at Greenpack for working (cutting) on the lines.

**2. Bonus system**

How does the bonus system works:

For the people who work (cut) on the lines it is important to know that you only earn bonus when you work minimal 1 hour/week the same type of work. This type of work must be done with a norm which is above the set bonus minimum. There is 1 condition, the norm must be above the set bonus minimum the whole week and not just for 1 or 2 days. When you work above this bonus minimum, the faster you work, the more bonus you get.

- Make sure you work at a constant speed, in the end you will get more bonus
- First prepare your workplace and then put your number and work type and start. You will earn more than when you do it the other way around.
- A good start is very important. A slow start is not smart.
