

Safe working with nail gun

Veilig werken met spijkerpistool

Code: I18.11 ENG

Revisie: 1

Versiedatum: 18-04-2024

In the first department, a nail gun is used when repairing pallets. The instructions below have been drawn up to work as safely as possible.

Greenpack assumes that all employees cooperate in a safe working process and will follow these instructions.

1. Only personnel who have completed the "safe working with nail gun" instruction are allowed to work with the nail gun.
2. The instructions given for working safely with nail gun should be followed.
3. Wearing safety glasses is mandatory.
4. Always hold the device with two hands and carry it only by the handle.
5. Disconnect the device for charging, discharging and maintenance.
6. Do not move the device with your finger on the trigger.
7. Never point the device at yourself or others.
8. Report any damage or defect of the device immediately to the supervisor.
9. Pallets should be repaired flat, on a level surface.
10. After use / end of work, store tools and accessories safely in the cabinet provided. Lock the cabinet with the combination lock.
11. Dangerous situations should be reported immediately to the supervisor.
